Name: _____ Date: _____

The Parts of a Plant

Answer Key

1) Roots: ***These anchor the plants and absorb water and nutrients that help the plant live.***

2) Stem: ***These carry water and nutrients from the roots to the leaves.***

3) Leaves: ***These catch light and air; photosynthesis occurs here.***

4) Flowers: ***These help form seeds and attract pollinators like bees.***

5) Seeds: ***These contain the genetic information and materials that will produce new plants.***

6) Fruits: ***These are the ripened ovaries of plants that contain seeds. They help spread the seeds, especially when they fall or are eaten and passed by animals.***
